

DPO LITE

For smaller organisations

WHAT IS IT?

Our 'lite' service offer is designed for smaller organisations that don't have a dedicated specialist in-house or a massive budget for external support.

It give you everything you need to support your Senior Responsible Individual or SLT.

It provides flexibility through the curated provision of self-help resources, guidance from our DPO team whenever you need it, and an annual benchmarking review - all mapped against the current ICO accountability framework.

The DPO lite service also suits organisations with their own internal capability who want a compliance platform with additional support from the DPE team.

KNOWLEDGE BANK

All the tools, guidance and resources to manage your information governance programme, curated by your DPE consultant.

ANNUAL REVIEW

An annual consultation to review your progress, incidents, and risks, as well as planning future activities.

UNLIMITED DPO TEAM SUPPORT

DPO Lite includes unlimited ticket-based support from our DPO-team for assistance with any data protection incidents.
